Ferns and Wild Flowers

Fall, 1947

Trillium grandiflorum (Snow Trillium)

ISAAC LANGLEY WILLIAMS

Exeter Wild Flower Gardens

EXETER, NEW HAMPSHIRE

INTRODUCTION

HERE at Exeter we are growing Wild Flowers and Ferns in quantity under overhead brush shade. We have over 300 species of selected Wild Flowers and Ferns growing under conditions favorable to the development of plants which can be transplanted to your garden successfully. The requirements of each species have been studied over a period of years, and those conditions necessary for producing specimen plants are carefully complied with.

The Exeter Wild Flower Gardens are located on the Newmarket Road, 1½ miles from Exeter. To reach us, drive through the Swasey Memorial Parkway, and go straight ahead on the Newmarket Road. After you pass under a railroad bridge, a Georgian brick house may be seen at the top of a hill. Look for the sign at the entrance. Visitors are always welcome.

Asplenium trichomanes
(Maidenhair Spleenwort)

HOW TO ORDER WILD FLOWERS

SHIPPING INSTRUCTIONS. Please state how you wish your order shipped. If no instructions are sent by a customer, we will use our best judgment, but will not be responsible for delay in transit.

PRICES. All prices are for plants f.o.b. Exeter, transportation charges to be paid by the purchaser. Six plants of one kind will be sold at the dozen rate, fifty plants at the hundred rate. If a single plant of one kind is desired, take one-third of the rate given for three and add 5 cents. Leaf-mold and Pine Needles cannot be shipped by Parcel Post.

TERMS. All orders should be accompanied by full amount in cash, check or money order.

GUARANTEE. All plants are guaranteed true to name and free from disease. Each shipment will be accompanied by a certificate of inspection. Our plants are dug and packed by experts. We, therefore, guarantee arrival in good condition. Should any express shipment arrive in poor condition, obtain a bad order receipt from your express agent and notify us immediately.

Hardy Native Ferns

The Ferns are one of our most useful groups of plants. They grow best in shady locations, but some will thrive in full sun. The following Ferns are strong, clumpy plants and include the best varieties for general use.

- ADIANTUM pedatum.** American Maidenhair Fern. 2 ft. Deciduous. Beautiful, feathery fronds on black stems. Shade.
- ASPLENIUM platyneuron.** Ebony Spleenwort. 6 to 12 in. Evergreen. Grows among the shaded rocks.
- trichomanes.** Maidenhair Spleenwort. 4 to 6 in. Evergreen. Daintiest of the Ferns. Grows in clefts in the rocks.
- ATHYRIUM filixfemina.** Lady Fern. 2 to 3 ft. Deciduous. One of the easiest to grow in partial shade or full sun.
- pycnocarpon.** Narrowleaf Spleenwort. 2 to 3 ft. Deciduous. Rich green. Vigorous fronds. For the rich woods.
- thelypteroides.** Silvery Spleenwort. 2 to 3 ft. Deciduous. Similar to the Lady Fern but with a silvery sheen from the color of the spores. Partial shade.
- BOTRYCHIUM virginianum.** Rattlesnake Fern. 1 to 2 ft. Deciduous. For open woods.
- CAMPTOSORUS rhizophyllus.** Walking Fern. Evergreen. Fronds 4 to 10 inches long that taper at the end and root from these tips. Grows on limestone cliffs. Shade.
- CYSTOPTERIS bulbifera.** Berry Bladderfern. 1 to 2 ft. Deciduous. Slender, graceful species that prefers a moist bank or brookside. Shade.
- fragilis.** Fragile Bladderfern. 6 to 12 in. Deciduous. Graceful, small Fern that grows in rich soil on banks and hillsides.
- DENNSTAEDTIA punctilobula.** Hayscented Fern. 1 to 2 ft. Deciduous. Graceful fronds that form a dense mat as this species spreads from the roots. Sun or shade. Strong clumps.
- DRYOPTERIS clintoniana.** Clinton Wood Fern. 2 to 3 ft. Evergreen. A large species suitable for moist woods.
- cristata.** Crested Wood Fern. 1 to 2 ft. Evergreen. A smaller edition of the above that grows on the hummocks in grassy bogs.
- dilatata.** Mountain Wood Fern. 2 ft. Evergreen. Found on high mountain peaks. Shade. 60c each, \$1.50 per 3, \$5.00 per dozen.
- disjuncta.** Oak Fern. 4 to 6 in. Deciduous. A tiny, graceful species with triangular fronds and black stems. Shade.
- filix-mas.** Male Fern. 2 to 3 ft. A rare species that grows among rocks. Almost evergreen. Shade. 75c each.
- goldiana.** Goldie Fern. 3 to 4 ft. The largest of the Wood Ferns. It grows in rich, moist woods. Deciduous. 60c each, \$1.50 per 3, \$5.00 per dozen, \$35.00 per 100.

Leaf-Mold Peat

Most of the Wild Flowers and Ferns grow naturally in a soil composed largely of Leaf-Mold. We are offering finely ground, screened, Leaf-Mold in 2-bushel bags. Weight 100 pounds. The Leaf-Mold should be mixed with the soil to the depth of several inches. It retains moisture, and also greatly benefits the condition of the soil. 2-bushel bags, \$2.50. By express or freight only.

Pine Needles

These are very useful for a mulch around acid-loving plants, such as Trailing Arbutus and Cypripedium acaule. Pine Needles may also be mixed to a depth of several inches in the soil where one is going to plant any of the acid-loving plants, particularly the Cypripedium acaule. These Pine Needles will be partially decomposed, and are ideal for the purpose intended. Price per 2-bushel bag, \$1.50; 5 bags, \$5.00 By express or freight only.

PRICES (except as otherwise noted) are 3 of the same variety and size for \$1.00, \$3.50 per dozen, \$25.00 per 100.
